USING SIAM'S LATEX MACROS[^2]

TEX PRODUCTION[^1]

Abstract. Documentation is given for use of the SIAM LaTeX macros. These macros are now compatible with LaTeX2$_\varepsilon$. Instructions and suggestions for compliance with SIAM style standards are also included. Familiarity with standard LaTeX commands is assumed (hello world).

Introduction. This file is documentation for the SIAM LaTeX macros, and provides instruction for submission of your files.

To accommodate authors who electronically typeset their manuscripts, SIAM supports the use of LaTeX. To ensure quality typesetting according to SIAM style standards, SIAM provides a LaTeX macro style file. Using LaTeX to format a manuscript should simplify the editorial process and lessen the author's proofreading burden. However, it is still necessary to proofread the galley proofs with care.
